Virtual Desktop Infrastructure Solution

Sangfor aDesk VDI (Virtual Desktop Infrastructure) Solution is the latest virtual desktop cloud solution based on hyper-converged infrastructure. Through deeply integrated server, desktop and storage virtualization, it takes a single aDesk thin client appliance and a cloud terminal to deliver rapid cloud platform deployment.

aDesk solution means ease of access and maintenance, greater portability and simplicity of management across multiple platforms, supplying employees working from home or traveling, quick and efficient access to the company intranet & internal resources.

Sangfor VDI securely interconnects employee devices and company PC's by creating a network, easily accessible anywhere in the world. Sangfor VDI provides a smooth remote access experience from different terminal types and different operating systems, while simultaneously ensuring the security of the connected business system.

Anytime. Anywhere. Any Device.

Only 600Kb network bandwidth required for single user WAN access.

Documents are stored in company server to prevent data leakage.

Files can be shared across different platforms, making workflow easier.

Remote Access Security Regulation

Advantages of Sangfor aDesk VDI Technology

The innovative Sangfor aDesk VDI desktop cloud solution, through front-end/back-end, software-hardware integration, makes desktop access smooth, stable, secure and efficient.

Smooth

- Highly Compatible with Peripheral Devices: Supports the use of USB flash drives, printers, cameras, high-speed scanners, U-key and other peripherals.

- Smooth Desktop User Experience: Desktop operation, business system access and high-definition video streaming.

- Sangfor-NVIDIA vGPU Solution: Meet customer GPU needs with extreme user experience.

Stable

- High Availability: Provides uninterrupted desktop services via HA desktop architecture.

- High Reliability: Data is stored reliably, lessening the risk of data loss due to disk/host failure.

Secure

- Secure Access: Multiple authentication methods can be easily combined to meet the security access needs of different user levels (e.g. employees, management, executives).

- Total Security: Provides end-to-end security mechanisms to ensure overall security of desktop cloud platform.

- Audit: Audit all exported documents & screenshots.

Efficient

- Rapid Deployment: Shorten desktop cloud deployment time by 80%. Deploy 100 VMs in just 5 minutes.

- Simple Management: Unified WEB control platform increases O&M efficiency by 80%. Application Black and White-List features manage all system software.

- Intelligent Diagnosis: Quickly and accurately locate the root of all issues with just a few clicks of a button, now with available data asset management.

SANGFOR

VDS-6550 VDI Applicance Server

- Storage virtualization

- Virtual desktop platform

- Virtual desktop controller

- 30 users access license

- 3 years hardware warranty

- 3 years software technical support
