

# HP Thin Clients with IGEL OS for healthcare

Patients rely on you, you can rely on us

Managing patient data is critical. Healthcare facilities trust HP Thin Clients with IGEL OS to assist with privacy and compliance standards, deliver reliability, and streamline IT operations.

## Help keep your patient data safe and centrally secured

Secure access to patient data for healthcare providers across clinical workstations with HP Thin Clients and IGEL's Preventative Security Model™.

Mitigate security risks with read-only IGEL OS that encrypts data, stores no data on the device and supports multi-factor authentication and single sign on solutions. <sup>1</sup>

## Designed for your healthcare settings

From reception areas to medical carts, our desktop designs can be mounted horizontally or vertically, and our mobile devices go with you. <sup>3</sup>

HP Thin Clients are tested for electromagnetic compatibility for safe use near patients and IGEL offers a connected ecosystem of solutions for administrative functions. <sup>2</sup>

## Easy deployment and maintenance

Empower healthcare providers to deliver excellent patient care with HP Thin Clients that require minimal updates and have long lifecycles.

HP Thin Clients with IGEL OS are easy to deploy, update, and secure from a central management console and the IGEL App Portal with secure onboarding service. IGEL OS eliminates the need for add-on management and security agents.

# Discover the versatility that HP Thin Clients with IGEL OS offer healthcare institutions across workplaces, workstyles, and workforces

## Patient Room

HP Thin Clients are tested for electromagnetic compatibility for use near patients and medical devices<sup>2</sup>

Embedded VESA mount attaches to displays, display arms, or flat surfaces

Solid-state fanless design provides zero noise for resting patients<sup>4</sup>

## Nurse Station

Imprivata badge workflows for quick, multi-user, secure access to EMR workflows

Accurate data recording: support for legacy peripherals and up to 6 UHD/4K displays<sup>5</sup>

Run digital displays and boards in all stations with discreet devices

Ultra-small form factors can be deployed anywhere in the station

## Offices & Clinic Rooms

Strong performance and data security for general office applications

Supports unified communications replacing desk phones and fax machines

Designed to use less power, offering cost savings over traditional PCs

IGEL OS supports native application of Microsoft Teams, Zoom, and Webex for high quality video calls

## Reception & Self Check-in Kiosks

Efficient access to cloud-based patient information and applications

Power large monitors in waiting rooms, campus directories, and more

Ultra-small form factor with no fan is dependable for kiosks

## Labs & Clean Rooms

Solid-state design prevents dust and airborne particulates

HP Thin Clients produce less heat than traditional PCs and no noise.

Lean, efficient IGEL OS helps optimize performance while reducing energy use

Access remote data and cloud apps, while mounting anywhere in the room<sup>3</sup>

## Telemedicine

Lightweight designs with long-life batteries provide uninterrupted productivity

Support telemedicine with an integrated HD webcam to stay closer to patients<sup>6</sup>

IGEL supports workload offloading from the virtual environment to the device to enhance video call quality

High resolution screens display critical medical information, even in challenging lighting

Learn more about HP Thin Clients and IGEL OS at [www.igel.com/hp](http://www.igel.com/hp)

1. Requires optional external dual-band RFID reader. Additional software must be purchased separately.

2. The HP Elite t755, HP Elite mt645 G8, HP Elite mt645 G7, and HP t640 include EN/IEC 60601-1-2: for electromagnetic compatibility for use near patients and medical devices.

3. Mounting hardware sold separately.

4. Fanless design is available on the HP Pro t550 and the Elite t655. The HP Elite t755 has a fan.

5. Use of six 4K displays requires a GFX AMD RX 6300 2GB GDDR6 Graphics card, sold separately and not included.

6. HP mt46 and Elite mt645 G7 mobile thin clients offer an optional 720p HD camera. The HP Elite mt645 G8 mobile thin client offers an optional 5MP or HD camera.

NOTE: On specific configurations, IGEL OS will be made available to end users pursuant to a thirty (30) day trial at no cost to the end users, with an option for end-users to extend the trial by registering with IGEL for a total trial period of 90 days. Following any trial period, end users must contact IGEL to purchase a license to the IGEL OS to continue use of the IGEL OS with HP Thin Clients.
