

**Better Together - Deliver secure hybrid work with Citrix Ready for Cloud validated IGEL OS endpoints.**

Citrix and IGEL have a long-standing partnership that empowers the hybrid workforce with a secure, savvy, and streamlined solution.

Upgrade your PCs, laptops, and thin clients of any make and model to a centrally managed and controlled workspace to access apps, data, and desktops securely and quickly.

### Why use Citrix DaaS with IGEL OS?

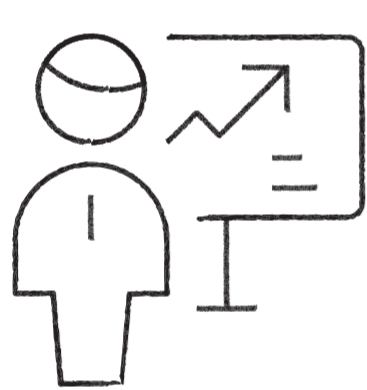

**90% of employees surveyed prefer flexible work**

**Ransomware attacks increased by almost 500% in the past year**

**Reusing existing hardware reduces IT project costs by up to 55%**

**Achieve sustainability goals with smart, efficient technology**

**Modernizing IT with Citrix DaaS and IGEL OS improves employee experience and productivity while allowing them to work from any device and from any location.**

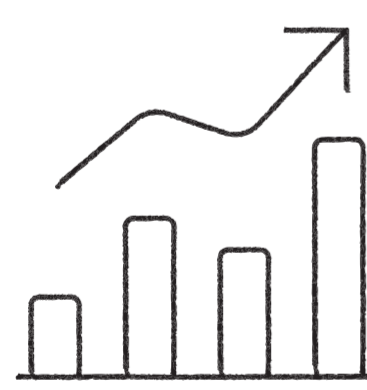

#### Increase business agility

- Onboard, manage and scale at speed without an on-site IT expert.
- With “buddy update” rapidly scale endpoints in areas of variable bandwidth.
- Enable multi-user profiles on each device Control “off-network” endpoints with the IGEL Cloud Gateway, with no VPN required.

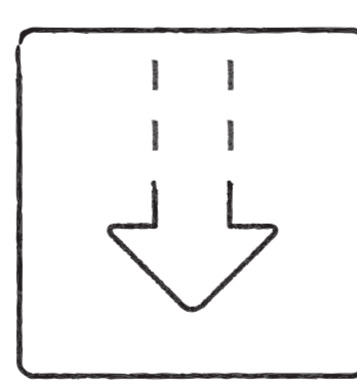

#### Achieve multi-layer security from the endpoint to the cloud

- Citrix leverages a zero-trust approach.
- IGEL OS stores no data on the device.
- The chain of trust verifies system integrity from boot-up to the Citrix workspace.

#### Excellent user experience boosts productivity

- IGEL OS supports Citrix HDX 3D Pro, Citrix Realtime Media Engine, and day-one support for Citrix HDX Plus for Windows 365 for a high-definition Cloud PC experience.
- Collaborate without compromise with high-fidelity unified communications optimized for Microsoft Teams and Zoom.

#### Reduce your power consumption by up to 49% with efficient IGEL OS

- Citrix and IGEL help organizations reduce their carbon footprint and slash energy consumption with technology that allows remote work, reuses hardware for longer, and optimizes IT resources.
